PROJECTS

Responsive E-Commerce Website

Developed a responsive E-Commerce website with a modern UI/UX, incorporating interactive elements for an enhanced user experience. Designed features like a sticky navigation bar, hero section, and product listings. Integrated animated buttons, hover effects, and Font Awesome icons for a dynamic interface

Employment Management System using JAVA

Implemented key features for employee management, including addition, update, delete and record viewing. Applied Object-Oriented programming (OOP) principles to ensure clean, modular and maintainable code. Designed a user-friendly interface to enhance interaction and navigation within the System.

Loan Management System-SQL

Developed and implemented a real-time Loan Management System using MySQL to manage customer profiles, loan details, and credit history, enhancing data retrieval and decision-making processes.

Colon Cancer Detection –Machine Learning

Implemented a PSO-based machine learning approach to enhance the accuracy of cancer detection by analyzing medical images and identifying patterns in cancerous cells. Optimized the classification process to achieve higher precision in detecting cancerous tissues, contributing to early diagnosis and improved patient outcomes.
